Center serving two  
school districts

**Curriculum:**

- HealthCenter21:  
Health Care  
Foundations

**Program Title:**

- Health Science  
Technology

**Instructor:**

- Grace Decken, RN,  
NBCT

### HealthCenter21 helps prepare students in a Health Science Technology program in South Carolina

At Daniel Morgan Technology Center, HealthCenter21 curriculum is used in the Health Science Technology program. “It has been a **big help for class management**,” says Grace Decken, program instructor and South Carolina Association for Career and Technology “Teacher of the Year.”

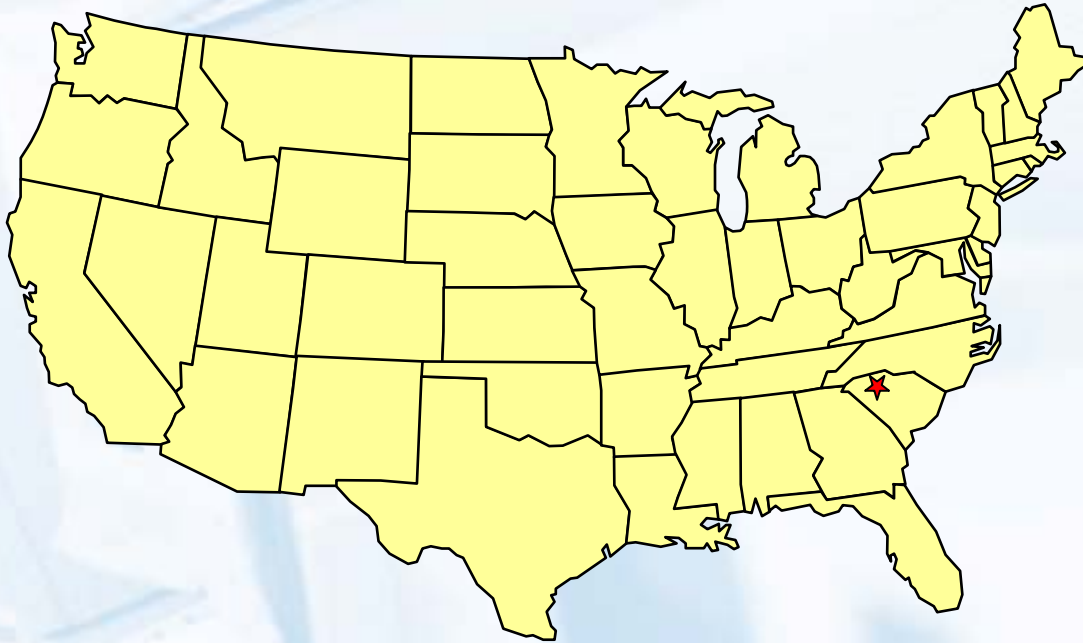

Because the program helps students obtain certifications in Nursing Assisting, Pharmacy Technology and CPR/First Aid, Decken uses the HealthCenter21 curriculum to teach a variety of subject areas. “I divide the class so that some students work on skills with me and most other students are at computers. The students seem to really enjoy the flexibility of learning and **more one-on-one opportunities for skills practice.**”

The WebTRAC management system allows teachers to **customize assessment to class and student needs.** “I have two special-needs students with IEP’s (Individualized Education Program), and they benefit a lot from being able to have extra time and extra opportunities to re-take tests for a better success in grades.”

Daniel Morgan students recently won numerous awards at the South Carolina HOSA (Health Occupations Students of America) competition. “Students were able to use the CPR methods, Client Status, Job Seeking Skills, and Health Care Careers units for **extra review prior to the competition**,” says Decken.
