Course Title: Introduction to
Business

Year of Installation: 2003

Students achieve success in the BusinessCenter21 lab at Edgewood High School. Mike Davis, Business Education Teacher, looks back on the first year experience with the AES program...

This year was the first year for Edgewood High School to experience BusinessCenter21...WOW what a year!

With the variety of business subjects presented through this program we were able to introduce our students to a wide range of business topics from accounting to international business. In the past our primary focus was on keyboarding and letter writing, **now with BusinessCenter21, we are able to offer more variety to our students, giving them the power to pursue careers in areas they have never been exposed to before.** The constant reinforcement of Microsoft® Word, Excel, and PowerPoint® was great! Other teachers in our building have commented that the **students seem to have moved up a level technically and they are using Microsoft® Office in a way far advanced than students have in the past.**

Our students have recently competed in regional competitions with other students in our county in a variety of topics and skills.

I am proud to say our students won awards in almost every category! Our topics included business ownership, accounting, business spelling, business terms, and interview skills. Our skills included business typing, Microsoft® Word, Excel, PowerPoint®, Access, Paint, Publisher, Windows 2000, Windows XP, hardware troubleshooting/repair, and business math.

Thank you AES for your great software, support, and training! And a special thank you to the support staff for their great patience and willingness to stay on the phone with us until we resolve our problem!
