Houlton, ME 04730

Program: ITcenter21:Computer Apps.

Instructor: Rainie Aucoin

Grades: High School - Vocational
Education

Course Title: Business Technology

Year of Installation: 2005

Rainie Aucoin, Business Technology Instructor at this Vocational Education school, talks about the versatility of this program that she teaches to both high school students and adults.

"First... I want to thank you for asking my opinion about this program. I went to AES training on August 23, 2005 and started to teach the program on August 31.

As you see, I had little time to look the program over and do any research before school started. Well...With a few long nights, I finally got ahead more than one day of lessons. You see I have students for 4 hours every other day.

I love the AES program and next year I know I will love it even more. Right now I'm still in the learning stages, but this program has been so beneficial to my students. You can't really get the whole picture of the course unless you jump right in and start. The lessons, skills and project units are amazing.

I have nothing but high praise for this system. I would highly recommend it to all business programs.

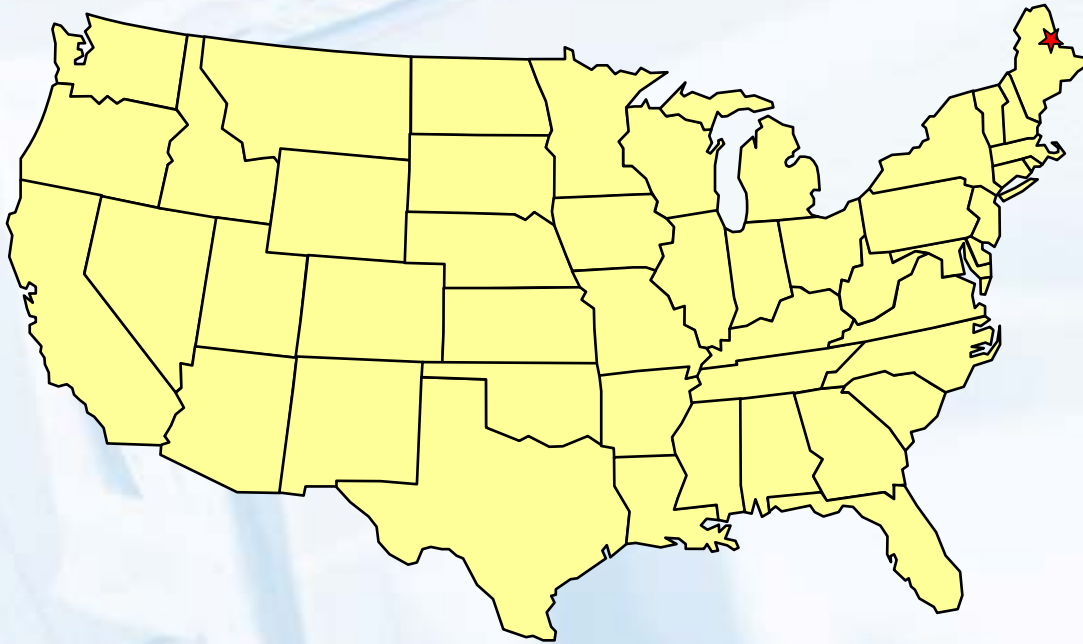

I'm using this program with 11th and 12th grade students. I'm also teaching an adult education course. With the AES program I can add projects or assignments in at any point.

In these photos you can see the open house that I put on for some of the businesses in our community. The businesses were very impressed with the system.

Again I can't say enough about the program. Great Job AES staff!"
