

Using Technology to Empower Marketers™

iCEV WCAG Compliance Report

5/8/2018

Summary

Smooth Fusion has been asked to review the iCEV web application to ensure that its components follow Web Content Accessibility (WCAG) 2.0 AA standards and technical standards required by the Federal Rehabilitation Act, Section 508. This document provides the details from the audit and demonstrates that the iCEV application does meet the AA standards.

About Smooth Fusion

Since 2001, Smooth Fusion has created more than 1700 digital projects including web site and web applications of all shapes and sizes. Smooth Fusion has created custom applications for end customers including Microsoft, Dell, Rackspace, Hewlett Packard Enterprise, Transamerica and many other clients.

Smooth Fusion has implemented web sites that meet WCAG standards for clients such as Microsoft.

Methodology

Smooth Fusion used several external scanning tools to check each page of the iCEV web application. We checked each page that any user type might see, including students, teachers and administrators. The results of each page test are found below in this document, along with explanatory text if needed.

Summary

As noted above, and demonstrated by the results of the individual page scans. The iCEV application meets the Web Content Accessibility (WCAG) 2.0 AA standards.

This document was submitted, by Brad Hunt, Vice President of Client Services and co-founder.
